

**Champion Thread Company®**

Advancing the Common Thread

**Renu™**

Renu is an innovative new line of environmentally friendly, ethically produced sewing threads made entirely from 100% recycled materials. These all-around threads offer more sustainable, non-virgin material options for stitching fashion, home, industrial, PPE, and other sewn products without sacrificing performance.

Renu products offer excellent sewing performance, colorfastness, and chemical resistance while contributing to the circular economy by reducing energy usage, waste, and oil dependence. They are engineered to CTC's extreme quality standards and are finished with proprietary lubricants to ensure high productivity.

**The Renu line comprises fully recycled versions of the company's most popular thread types, including:**

**Renu™ ChampSpun™** - High tenacity 100% recycled staple spun polyester thread that provides a uniform construction and high resistance to UV and chemical degradation.

**Renu™ Poly ChampCore™** - Recycled polyester-wrapped thread with a recycled multifilament core. It is ideal where high seam strength and high-temperature stability are required.

**Renu™ AeroTex Plus™** - Recycled textured polyester thread with continuous filaments that provide a soft, bulky feel. It is ideal for use on overlock and coverstitch machines.

*The Renu line of 100% recycled threads represents CTC's commitment to 'Advancing the Common Thread'*

*Since 1979, Champion Thread Company® develops and produces premium sewing threads, engineered yarns, and accessories for textile and sewn products manufacturers. With 40-years of growth, CTC® remains dedicated to delivering the highest quality at competitive prices. A promise supported by the technical and industry expertise needed to solve the toughest product, production, and supply chain challenges. Family-owned and operated, CTC delivers a level of quality, service, and partnership that larger firms have long forgotten, and small suppliers cannot sustain.*
