Champion Thread Company®

Advancing the Common Thread

ChampRenu®

Made from
100% Recycled Materials

Champion Thread's ChampRenu is an innovative new line of environmentally friendly, ethically produced sewing threads made entirely from 100% recycled materials. These versatile threads offer more sustainable, non-virgin material options for stitching fashion, home, industrial, PPE, and other sewn products without sacrificing performance.

ChampRenu products offer excellent sewing performance, colorfastness, and chemical resistance while contributing to the circular economy by reducing energy usage, waste, and oil dependence. They are engineered to CTC's extreme quality standards and are finished with proprietary lubricants to ensure high productivity.

The ChampRenu line comprises fully recycled versions of the company's most popular thread types, including:

ChampRenu® ChampSpun® -High tenacity 100% recycled staple spun polyester thread that provides a uniform construction and high UV and chemical degradation resistance.

ChampRenu® Poly ChampCore® - Recycled polyester-wrapped thread with a recycled multifilament core. It is ideal where high seam strength and high-temperature stability are required.

ChampRenu® AeroTex® Plus - Recycled textured polyester thread with continuous filaments that provide a soft, bulky feel. It is ideal for use on overlock and coverstitch machines.

The ChampRenu line of 100% recycled threads represents CTC's commitment to Advancing the Common Thread.

Since 1979, Champion Thread Company® has developed and produced premium sewing threads, engineered yarns, and accessories for textile and sewn products manufacturers. With decades of consistent growth, CTC® remains dedicated to delivering the highest quality at competitive prices. This promise is supported by the technical and industry expertise to solve the most demanding product, production, and supply chain challenges. Family-owned and operated, CTC delivers a level of quality, service, and partnership that larger firms have long forgotten and small suppliers cannot sustain.
